Application Serial No. 08/385,206
Attorney's Docket No. 001560-223

15. (Amended) A process for production of a highly aromatic wort comprising the steps of:

(1) extracting hops with a supercritical or subcritical carbon dioxide solvent to obtain a carbon dioxide extract and a hop extract residue;

(2) separating a hop extract from the carbon dioxide extract;

(3) mixing the hop extract and the hop extract residue to obtain a product;

(4) adding the product from step (3) to a wort which is being boiled.

wherein the product is added while boiling [during] the wort [boiling]; and

(5) further boiling the wort containing the product for at least 4 minutes.

17. (Amended) A process for production of a highly aromatic wort comprising the steps of:

(1) extracting hops with a supercritical or subcritical carbon dioxide solvent to obtain a carbon dioxide extract and a hop extract residue;

(2) separating a hop extract from the carbon dioxide extract;

(3) mixing the hop extract and the hop extract residue to obtain a product;

(4) adding the product from step (3) to a wort which has been boiled.

wherein said product is added after boiling [after] the wort [boiling] during a [the] whirlpool rest; and

5) maintaining the wort containing the product at a temperature of at least 95°C for at least 10 minutes.
